Rebuilding for use of transmitter

Before start rebuilding the door

Switch of power on the door and use the door until 0 bar pressure on the manometer. Then disconnect 24 voltage to the door.

Start rebuilding by removing Low pressure switch (red star) and Pressure switch. Enclosed in the rebuilding set a plug for the hole where low pressure switch, (orange star)where mounted.

Install the Transmitter where the Pressure switch was mounted before (large red star). Replace the glands (yellow star) and plug the other cable gland not in use.
