G1 SOLENOID VALVE BLOCK FOR N2 SWT DOORS

THIS INSTRUCTION ONLY APPLIES FOR RIGHT DIRECTION DOOR.

FOR LEFT DOOR, THERE IS NO NEED TO MAKE ANY CHANGES/UPGRADES.

You need a complete G3-1 Solenoid Valve.

The first step is to disassemble the top of the solenoid valve.

Then mark the place for drilling a hole, as shown on the photo.

After drilling, the hole should look like this.

Then place the top of the solenoid back on the solenoid base, as shown on the photo.

Place the plastic part back into the housing.

Install the cable back and connect the two wires, as shown on the photo.

At the end mount the solenoid valve on the hydraulic valve block(Operation Bracket).
